## Relevant Skills

- Soft Skills: Empathy, willingness to learn, critical problem-solving, driven, motivated, willingness to help others succeed, management, teamwork, Leadership, effective communicator, dependability, adaptability, research, collaboration
- Technical Skills: HTML5, CSS/SCSS, JavaScript, ReactJS, TypeScript, React Redux, Python3, Flask, SQL, PHP, Laravel, MongoDB, Redis, UX, UI, UML, Git, GitHub, Rest APIs, Agile Methodology, SCRUM Methodology, Responsive Web Design

## Projects

- **VacationCandy:** Full stack developer on a team of developers and QA specialists. A website for vacation rentals that uses React with TypeScript and Redux on the frontend with a PHP backend. I work daily with frontend development and SQL databases. <https://vacationcandy.com/>
- **Happy Home Family Organizer:** A multi-page, mobile responsive website that was designed to help families keep track of a shared family calendar and individual trackers for to-dos and chores. This application was built using ReactJS for the frontend and Python with Flask and SQL for the backend. <https://happyhome-frontend.herokuapp.com/>
- **2Easy Military Gear Cleaners:** A react website for a cleaning business run by my husband. The website allows you to view all the prices for the services offered by the cleaning business, and a contact form using EmailJS to contact my husband directly through the site. <https://2easy-ta50.com/>
- **React Portfolio:** An application that allows you to see all the projects I have completed along with the skills that I have. This application implements react-scroll and allows you to download my resume, access all the projects that I have worked on and links you to my github profile. <https://amberlynsisk.com>

## Work Experience

- **VacationCandy, Full Stack Developer** 08/2022-Present
  - ⇒ Work with a full team of developers and QA specialists in an Agile workflow.
  - ⇒ Create new features for the company website, which is being completely re-written from a legacy codebase.
  - ⇒ The VacationCandy website is built with a React frontend which utilizes TypeScript and React Redux and a PHP backend that utilizes Laravel.
- **2Easy Military Gear Cleaners, Freelance Software Engineer** 04/2022-Present
  - ⇒ Creating an information and contact website for my husband's cleaning business
  - ⇒ Utilizing UMLs to show a clear picture of how a user can / will travel through the website.
  - ⇒ This website is built in ReactJS, HTML, CSS and have a light webpack configuration to use SCSS in the React Application.
- **United States Army, AH-64 Systems Repairer** 11/2015-03/2020
  - ⇒ Quickly learned new skills and applied them to daily tasks, improving efficiency and productivity.
  - ⇒ Carried out day-day-day duties accurately and efficiently.
